Department of Public Works
Hood River County
Hood River, Oregon 97031

Gentlemen:

Regarding our survey in Section 7, Township 2 North, Range 8 East, Willamette Meridian, our job number 69-242. As stated upon our tracing this survey was based on a 1937 survey by Marshall Brothers of Portland. We also used as reference maps, the Columbia River Highway maps of the Oregon State Highway Departments and mile maps 5 and 6 of the Bonneville - The Dalles Power line that were acquired from the Bonneville Power Administration.

Due to the fact that the East one-quarter corner, the South one-quarter corner and the Southeast corner of the Section were not in we followed the procedures outlined in the B.L.M. manual of surveying.

The information on the State Highway Maps and Bonneville Maps were used to fill in the distances not recorded on the Marshall Brothers survey. We did not reference any of our corners, but could replace them from traverse ties or from ties to the B.P.A Lines.

If you have any further questions, refer to Job No. 69-242 and feel free to call upon us.

Yours truly,
Ronald Lambert

Gentlemen:

We received the mylar prints of your survey in Section 7,
Township 2 North, Range 8 EWM.

We are requesting that a resume of the surveys be filed
with the drawing, telling: the source of information for starting
the survey; condition of monuments found, with supporting evi-
dence of BT's, witness pipes, etc. We are also requesting
information on the methods used to establish corners along with
a detail of any references.

We are enclosing a few corner cards, for your convenience.
You may record the corner information on these cards and we
will file them in our permanent corner monument file.

Very truly yours,

Carlos Van Elsberg,
Director
