FIELD NOTES:

FOR: Resurvey and Legalization of York Hill Road

WORK PERFORMED BY: Hood River County Survey Department

In researching York Hill Road, it was found that the road, as built, did not follow the right of way as described in the original road case; therefore, in July of 1970 the Hood River County Survey Department began a survey of York Hill Road to provide an as built location for mapping prior to legalization proceedings to acquire additional right of way and vacate the unused right of way.

The traverse began at the quarter corner between Section 8 and 9, Township 2 North, Range 10 East of the Willamette Meridian. It ran along York Hill Road to Binns Hill Road; thence along Binns Hill Road and terminated at the quarter corner between Sections 17 and 18, Township 2 North, Range 10 East of the Willamette Meridian. The traverse was closed by using Hood River County control point Nard as a point in the traverse. Closing angles were turned from and to points in the traverse and the distances were measured with Tellurometers. Bearings were based on solar observation. Field notes are filed in Book 70-6

Corners Found:

The quarter corner between Sections 8 and 9, Township 2 North, Range 10 East of the Willamette Meridian - an iron pipe which has since been replaced by a Hood River County Brass Cap in a monument case.

The center quarter corner of Section 8, Township 2 North, Range 10 East of the Willamette Meridian, - a 3/4" iron pipe referenced by an aluminum tag posted by the County Surveyor, dated 1959.

The corner common to Sections 7, 8, 17 and 18, Township 2 North, Range 10 East of the Willamette Meridian - an 1-1/4" iron pipe. No B.T.'s or other evidence was found to prove this pipe to be a true corner.

The quarter corner common to Sections 17 and 18, Township 2 North, Range 10 East of the Willamette Meridian - a 1" iron pipe. No evidence was found to support this pipe as a true corner. The property owner, Mitz Tamiyasu, said this pipe was a 6.0 foot offset to the quarter corner which was set by Doug Button when he was the County Surveyor.

I certify that this work was done under my direct supervision.
