FIELD NOTES:

FOR: Cascade Locks Urban Renewal Area. Job #71263; Survey in the Northeast one-half ($\frac{1}{2}$), Southwest one-quarter ($\frac{1}{4}$) Section 12, Township 2 North, Range 7 East of the Willamette Meridian

CREW: Anthony C. Klein - Party Chief
Jim Robinson - Instrumentman
LeRoy Daley - Chainman

DATE COMPLETED: November 30, 1971

Our firm was engaged by the Cascade Locks Urban Renewal Agency to survey the boundary and topo the area as described in the description furnished by them.

The records of Hood River County Survey office and two (2) surveys of the area were obtained. One was by Mart Perkins dated January 1971 and the other was by Richard King dated May, 1967.

It was found during the course of the work that a good majority of the monuments found and established during the course of the survey in 1967 were destroyed, particularly those along State Highway 30.

The basis of bearing was that established along the centerline of Moody Avenue during the survey of 1967.

The centerlines of Fifth Street, Sixth Street and Moody Street were established from the monuments found along these street. The boundary that goes North from Sixth street was held parallel to the centerline of Moody Street. The northerly boundary of Seventh Street was located using the bearing as established on the 1967 survey from the iron pipe found at the angle point 230 feet East of U.S. 30. The remainder of the lines in this area were held according to found monuments in the vicinity. The monuments found that were used to establish U.S. 30 seemed to fit the existing curbs.

All corners found and established during the course of this survey together with all bearings and distances are shown on the attached map, which by reference is a part hereof.
