FIELD NOTES

FOR: Port of Cascade Locks in the Northeast quarter of the Southwest quarter, Section 12, Township 2 North, Range 10 East of the Willamette Meridian, City of Cascade Locks, Oregon. Project #73286

CREW: A. C. Klein - Party Chief
J. Robinson - Instrumentman
L. Daley - Chainman

DATE COMPLETED: January 17, 1974

Ron Rombalski of the Port of Cascade Locks requested that our firm locate and set corners of an irregular tract of land purchased by them.

The County survey record and records on file at our office were researched. A survey by our firm (Project #71263) of the Urban Renewal Area was found. This survey was just west of the parcel to be surveyed.

A traverse was run and all existing monuments were tied in. At one point a metal hot water tank was found buried vertical in the ground. It was determined that this was a property corner after close observation. The center of the tank had a plug in it with a tack. We found no record of it but it fit the survey and was held as a corner.

All monuments found and established during the course of this survey along with bearings and distances are shown on the attached map which by reference is made a part hereof.
