Job Resume

Of survey of the N.W.  $\frac{1}{4}$  of Section 19, T 1 N, R 10 E, WM.

I ran a traverse line from the North  $\frac{1}{4}$  corner of Section 19, West to the Northwest corner of Section 19. I found an iron pipe and brass cap with witness trees. At about halfway though I found a 1 inch iron pipe bent over from farm equipment and off the fence line, which proved to be 2.53 south of line and 6.93 West of relocated 1/16 corner. I relocated this corner by single proportionate measurement. I ran a traverse South and found the West  $\frac{1}{4}$  corner, a 1 1/2 inch iron gas pipe as shown on John Henderson survey. I then ran traverse East and found iron bolt for 1/16 corner, as shown on Henderson survey. I ran on out to center of section a 1  $\frac{1}{4}$  inch iron pipe at edge of road. I then managed a wiggle point on an offset sighting to south  $\frac{1}{4}$  corner and North  $\frac{1}{4}$  corner to prove 1  $\frac{1}{4}$  inch iron pipe for center of Section. Accepted it. I then ran North with traverse to the N  $\frac{1}{4}$  corner to close my work out which worked out to be good, a 0.28 error. I divided the  $\frac{1}{4}$  section up as shown on my survey plat. I set the center of Gov't lots 1 and 2 and ran from there on true line S 89<sup>0</sup>57' W 718.88 feet to the West line of Section 19 and set an axel 2.5 feet East of a iron bolt that we found as per Henderson plat.
