NARRATIVE

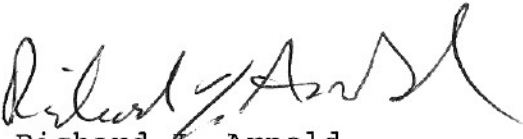

Survey in Section 6 T.2N R.10E

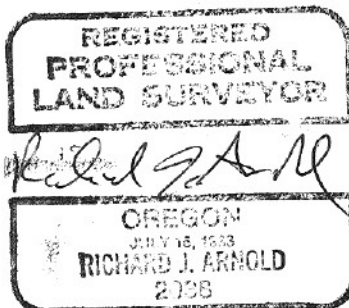

The Hood River County Survey Dept. performed this survey at the request of the Hood River County Forestry Dept, in order to locate the South line of the County Forest Lands in the South-east 1/4 of Section 6.

The North, South, and East 1/4 corners were found and accepted. The West 1/4 corner was calculated by proportionate methods as per H.R.C. Survey #77109. This corner has been searched for several times without success. The Southeast Section corner was also found and accepted. These corners were tied by field traverse.

The Center-South 1/16 corner and the South 1/16 between Sections 5 & 6 were calculated, and the Center-South 1/16 was set. A mound of stones was found within three feet of our calculated position for the South 1/16 between Sections 5&6. This corner was set in 1909 by J.L. Henderson. Two rotted fir stumps were found that fit J.L.H.'s notes perfectly. I decided to accept the mound of stones rather than move the corner three feet.

The line between the C.S. 1/16 and the S.1/16 was then blazed.

Richard J. Arnold
County Surveyor
