

Old Paper Survey Index

The old paper index that was previously available in this office will be stored in the vault and will only be available on request to the office staff.

Scans of the old index are being provided as an additional resource for survey research and are available in the Surveyors Office research directory.

The old index is worn and delicate and was becoming very difficult to keep updated. The digital index on the county Webmap should be used as the primary research option.

The last survey to appear on the old paper index is CS#2015015, dated March 17, 2015.

If you have any questions or need assistance with research please contact the County Surveyor or office staff.
