 North Zone"

"REVISIONS"

- ① In the summer of 1982, the original 1/4 corner between secs. 15 & 16 was found by the H.C. survey Dept. This necessitated the recalculating of the following corners:
 Sec. cor. 9/10; 1/4 cor. 9/10; 1/4 cor. 9/16;
 and the 5/16 cor. 16/15.
 Dick Ansdold
 Oct. 1982
- ② The orig 1/4 cor. 32/20 was found in 1983.

"Resume"

In 1975 the Hood River County Forestry Dept. requested a survey of a portion of Township 1 North Range 10 East, located on a title containing 120 acres that the boundaries of H.C. forest lands could be more accurately determined. Complete sections breakdown sections 3, 4, 5, 6, 7, 8, 9, 10, 16, 17, and 18 were required.
 Section and quarter corners set during the original survey were poorly documented, resulting in many lost and obliterated corners.
 The survey commenced with a search for all section and quarter corners. These were tied together with several closed traverse loops. Closures varied from 1:10,000 to 1:20,000. Twenty-three section and quarter corners were calculated by single and double proportionate methods, none of which were set.
 Two inch iron pipes with brass or aluminum caps were used to subjoin out all corners, and bearing trees were scribed.
 The survey was completed in the summer of 1978.
 Dick Ansdold, Party Chief
