

Resume

Complete section breakdowns of secs. 13 and sec 24 had previously been done by H.R.C. in 1977 and 1978. The w¹/₁₆ ¹³ and the w¹/₁₆ ²⁴ were set in 1978. Coordinates for the CW¹/₁₆ sec 13, the CW¹/₁₆ sec 24, and the w¹/₁₆ ²⁴ were obtained from the previous surveys.

A random traverse was run from the w¹/₁₆ ¹³ south for two miles & was found to close on the 1978 survey within 2.7 feet. The traverse was then balanced and true line calculated. U.S.F.S. boundary signs were set on true line approximately every 5 chains except for the portion of the line which ran through the Lava Beds. This portion of the line has U.S.F.S. boundary signs approximately every 6 to 10 chains as the lack of trees & brush make the signs inter-visible.

For detailed corner information see H.R.C. The corner card file.

The survey was completed in June, 1980.
