**NARRATIVE**

The Base Line thru R.9E. of the W.M. was originally surveyed by David P. Thompson in 1858 & 1859. Said Base Line was then RESURVEYED in 1884 by Newton Clark.  
 In 1940 the B.L.M. did a dependent resurvey of the Base Line thru R.9E. & a partial survey of T.1S., R.9E., W.M.  
 On Sept. 17, 1984 the U.S.D.A. Forest Service contracted the survey of several of the holdings within the Hood River Ranger District. This particular survey is part of Area #1 of said contracted survey. All field angles were turned with a Wild T-1. All distances were measured with a H.P. 3805A. Minimum position closure required was 1:5000. Field notes are contained in D.L.C. Field Books 85-4 & 85-5.
