BASIS OF BEARINGS: Assumed, derived from Reference 1

LEGEND:

- Found corner of record
 - Set iron rod, or iron pipe/brass cap, as described
- (Ref.1) Distances by others

REFERENCES:

1. Survey of GLENHURST ORCHARDS, Book 2, Page 6 of Plats, 1910

NARRATIVE:

Work commenced on this project November 7, 1988 and was conducted as time permitted through January 16, 1989. The corner to 7 | 8 was previously set in 1958 by proportion, the location of which was used in Reference 4 for additional work along the line common to Sections 7 & 8. Reference 2 established a corrected position for this corner which has been accepted, and was used for this survey. The remaining exterior corners of Sections 7 & 8 were considered as controlling, and a closed traverse was run through all corners with a Pentax TH-10D total station. The center of Section 8 from Reference 1 was recovered and used as a controlling corner, but the C-W 1/16 and NW 1/16 corners were somewhat in error both by the call and measured distances and were not used; both fall outside the line established by this survey. No original evidence of the 1/4 corner to 7 | 8 could be found, and the corner was established by single proportional measurement. I note that a position determined from found Reference 1 corners would fall within 7 1/2 feet of the corner set.

The NE 1/4 of Section 7 was added to this work during the project and all boundaries as requested were flagged. The position of the NE 1/16 of Section 7 was calculated from Reference 2 and adjusted by this survey.
